GDP vs. Healthy Life Expectancy

LIFE EXPECTANCY

- **Positive correlation between Healthy Life Expectancy and Happiness.**

FREEDOM

- We also see positive correlation between Freedom and Happiness.

Freedom vs. Happiness

SOCIAL SUPPORT

- **Positive correlation between Social Support and Happiness.**

Social Support vs. Happiness

CONCLUSIONS

- Wealthier countries and ones that have sustained economic growth tend to have higher average happiness levels.
- Healthier countries and countries with more freedom granted to make life choices also tend to have a happier population.
- However, healthier countries also tend to be wealthy.
- *Evidence suggests that wealth, health, and happiness go together.

Thank you.
